

Transport Knowledge Hub

Transport price data across a number of categories presented in our interactive hub.

For the last 10 years' we have collected price data across a number of categories including ferries, public transport, fuel and flights.

Purpose of Transport Knowledge Hub

This Transport Knowledge Hub provides you with this data in an interactive way.

You can compare things like:

- the average commuting cost to Belfast from towns and cities in NI;
- public transport prices across different regions in the UK;
- average flight cost from NI by airline;
- petrol and diesel prices; and
- average fare prices for short and long sea crossings.

We will continue to track and publish this data on the Transport Knowledge Hub on a weekly basis.
