Understanding your electricity bill

4 Account Number

This is your unique identification number.

Meter Point Reference Number

This number is used to identify the property that has the supply.

Billing Address

The name and address to which bills are sent.

Supply Address

This is the address that receives the actual supply.

Payments since last statement

A record of your previous bill amount, any payments received and any balance outstanding carried over to your current bill. "CR" indicates a credit amount.

6 Billing period

This highlights the dates that the current bill covers.

Meter Serial Number

All meters have a unique serial number and this should match the serial number displayed on your bill.

8 Previous Reading

The meter reading that was used to calculate your last bill. (There may be abbreviations to indicate the type of reading; (A) Actual reading (C) Customer provided reading & (E) Estimated reading)

Present Reading

The most recent meter reading that will be used to calculate this bill.

Units Used

The number of units used between the previous and current meter readings.

Unit Price

The price charged per unit.

Total

The total cost calculated by multiplying the number of units used by the price per unit.

Walue Added Tax (VAT)

VAT is payable on energy bills and is 5% for domestic customers.

4 Amount for this period

This is the total amount for the billing period including units used and any other costs such as VAT.

15 Total amount due

This is the total amount for this billing period and inclusive of any amount carried over from the last billing period. This amount is due for payment.
